

MOSTAFA MOHAMED GODA

Software Engineer | Backend Engineer | Cloud | Full Stack

New Cairo, Cairo, Egypt • +20 1099307299 • magopa092@gmail.com

GitHub: github.com/MOSTAFAGTR | LinkedIn: linkedin.com/in/mostafa-goda-008251275

PROFESSIONAL SUMMARY

Software Engineer specializing in backend engineering, cloud-native applications, distributed systems, and secure full-stack development. Experienced in designing scalable RESTful APIs, containerized environments, and modern software platforms using Python, Java, React, FastAPI, Docker, SQL, and modern software engineering principles. Strong foundation in software architecture, DevOps practices, application security, and Agile development with a passion for building reliable, scalable, and production-ready software solutions.

CORE TECHNICAL SKILLS

Programming Languages: Python • Java • JavaScript • TypeScript • SQL • PHP • C++ • Dart

Backend Engineering: FastAPI • Spring Boot • Node.js • Express.js • REST APIs • SQLAlchemy • Authentication & Authorization • Microservice Architecture

Frontend: React • TypeScript • Tailwind CSS • Flutter • HTML5 • CSS3

Databases: MySQL • PostgreSQL • SQLite

Cloud & DevOps: Docker • Docker Compose • Linux • Git • GitHub • Postman • JMeter • Containerization • CI/CD Fundamentals

Software Engineering: Object-Oriented Programming • Software Architecture • System Design • SOLID Principles • Design Patterns • SDLC • Agile Scrum

Application Security: Secure Coding • OWASP Top 10 • JWT • RBAC • Semgrep • Static Analysis

PROFESSIONAL EXPERIENCE

Operations & Procurement Coordinator | Emar Trading Agencies (ETA)

Part-Time | 2020 – Present

- Coordinate international procurement operations for industrial automation products, managing supplier communication, logistics, banking transactions, and import processes.
- Collaborate with engineering teams and manufacturing clients to source technical solutions involving pneumatics, mechatronics, actuators, and factory automation systems.
- Streamline procurement workflows while maintaining supplier relationships and ensuring timely project delivery across multiple stakeholders.
- Developed strong analytical, leadership, communication, and project coordination skills through managing high-value technical procurement operations.

Full Stack Web Development Intern | National Telecommunication Institute (NTI) / ITIDA

August 2025

- Successfully completed an intensive 120-hour Full Stack Web Development program with a final score of 88.5%.
- Developed responsive PHP, JavaScript, and MySQL web applications while applying modern software engineering principles and database design best practices.

ENGINEERING PROJECTS

SCALE — Security Challenge & Learning Environment | Python, FastAPI, React, Docker, MySQL

- Architected and developed a production-scale cybersecurity learning platform consisting of seven containerized services using React, FastAPI, Docker, and MySQL.
- Designed scalable RESTful backend services supporting authentication, AI-assisted learning, real-time instructor activities, and automated security analysis.
- Engineered a secure Docker-based execution environment capable of safely running untrusted user code under strict CPU, memory, process, and network isolation.
- Built an automated application security pipeline integrating Semgrep, custom static analysis, and dependency vulnerability scanning.
- Led backend architecture, database design, API development, deployment strategy, and DevOps orchestration following Agile software development practices.

QuizMaster — Modular Quiz System | React, Node.js, Express, MySQL

- Developed a secure full-stack learning platform implementing JWT authentication, role-based access control, REST APIs, automated grading, and responsive React interfaces.
- Designed modular backend services supporting quiz management, instructor workflows, and student assessment.

Personal Finance & Spending Analyzer | Flutter, Dart, SQLite

- Developed a cross-platform mobile application featuring offline persistence, financial analytics, GPS integration, receipt scanning, and interactive reporting.
- Implemented Riverpod state management to deliver a scalable, maintainable, and responsive mobile architecture.

EDUCATION

Bachelor of Science in Computer Science, Minor in Software Engineering | Misr International University (MIU) 2022 – 2026

CERTIFICATION

Full Stack Web Development using PHP | National Telecommunication Institute (NTI) / ITIDA Professional Training Program

LANGUAGES

Arabic — Native

English — Professional Working Proficiency (C1)
